CRISIL Rating	AA-	AA-	AA-	AA	AA	AA	AA	AA+	AA+	AA+

Note :-

Credit Rating Cross-Check:

Tata Power's CRISIL long-term rating has moved from AA- (FY17 - FY20) to AA (Nov 2020 - Mar 2024) to AA+ (Apr 2024 - present), a clean upgrade trajectory with no downgrades over the model period. CRISIL's own stated rating threshold has been Net Debt/EBITDA sustained below 3.5 -4.0x. This scorecard's Net Debt/EBITDA series (8.16x in FY17, declining to 3.98x in FY25, rising to 5.15x in FY26) tracks this trajectory directionally, though the FY26 uptick above CRISIL's stated threshold is worth monitoring against the next rating action. This scorecard's composite score is benchmarked against this actual rating history, not a theoretical target.
